Remote Access & Support

Handle all your IT issues with LogMeIn.

Ensure your team is ready to handle anything and everything, from routine IT management to complex problem-solving, with LogMeIn's remote management, access, and support solutions.

LogMeIn Resolve

LogMeIn Resolve empowers IT teams and MSPs to streamline their operations with a unified solution, bringing together remote access & support, RMM, ticketing, automation, asset management & more. Free and paid account options available.

- Multi-platform remote support & access with built-in Zero-Trust security
- Intuitive remote monitoring and management (RMM) capabilities
- Automated remote execution with AI-assisted scripting
- Natively integrated, unlimited asset management
- Productivity-driving AI features including an interactive AI assistant

LogMeIn Central

Internal IT, MSPs, and hardware (kiosks, POS systems, digital signage) support teams rely on Central to remotely monitor and manage IT infrastructure, secure endpoints, automate task management, and gain better visibility into their IT universe.

- End-to-end monitoring and proactive alerting
- Integrated antivirus software and antivirus management
- IT automation and patch management
- Employee (non-IT) device access permissions

LogMeIn Rescue

With powerful remote support features, advanced security capabilities, and ample customization options, LogMeIn Rescue is best for teams at large businesses and enterprises to provide technical support to employees and customers.

- Break-fix desktop and mobile remote support
- Secure, customizable connection methods and branding
- Granular permissions and advanced account administration
- Built-in integrations and open APIs
